Hi Ruth,

See post below. I wanted to check in to see if you might be able to schedule a call with Shelby this week to get an update on Toki and inquire about having APHIS come out? I think it would be good if I could be on that call if okay with you. I can make my schedule work as needed if you can get time with Shelby for a call. Or, if you can set up a visit to go there in person, that is fine as well.

Also, FYI, I emailed Mridula and Jenny last week to inquire about your participation in carrying out the dignity plan and will let you know when I hear back (or they may let you know).

Let me know.  
Thanks,  
Amy

The dedication that our vets and animal care staff provide for our animals is unmatched. This couldn't be truer when it comes to the care of our beautiful Tokitae. We have a special team, including world-renowned experts, that is dedicated to making sure Toki receives round-the-clock care.

Medication has stabilized Toki's health after the respiratory condition she experienced early this year. While not considered critical, her appetite has decreased. With guidance from Toki's vet, as well as the foremost marine mammal experts in the world, extra precautions are being taken.

Thank you for your interest in Toki; please send your positive vibes and prayers her way. We will provide updates on her condition as soon as we're able.

Hi Amy,

I was able to get a call into Shelby on Friday last week about 5pm. I'm hopping on a call now, but I can fill you in after.
